

Komodo 8 Night Itinerary (Labuan Bajo to Labuan Bajo)

Day 1: Labuan Bajo, Arrival & Boarding

After a one-hour flight from Denpasar (Bali) you will arrive in the small port town of Labuan Bajo, Flores. Our staff will pick you up at the airport for immediate boarding and departure to our first dive site the island of Sebayur with a nice dive including marbled hatchetfish, lionfish, eels and possibly the resident ghost pipefish. The perfect "warm-up dive". On the neighboring reef, nudibranchs, pipefish, sea fans, sponges and scorpion fish. During the night dive you might see carpet sharks, nudis and crustaceans.

Day 2: Gili Lawah Laut

Home to two of the best pinnacles in all of Indonesia, "Crystal Rock" and "Castle Rock". Huge schools of jacks, giant trevally, white tip and grey reef sharks, barracudas, dolphins and a whole host of smaller reef fish that float amongst the fields of staghorn coral. A challenging site, but certainly worth diving!

Day 3: Gili Lawah Darat

Discover the famous dive known as "El Toro", kind of a pot, where the current attracts pelagic, sharks, trevally, tuna and sometimes Mantas. Do not miss! Go for an excursion on land, or on sea and meet the permanent family of dolphins in this area. The night dive named "Flamenco Show", the Spanish dancer and macro. Lighthouse Reef: a nice dive site with hard corals and lots of bushes of black coral.

Days 4: Komodo Channel

Tatawa Besar, one of the most colourful drift dives in all of Komodo. Look at the horizon while flying along endless coral gardens with sandy slopes. Eagle rays and turtles are typical guests along this rich coral slope. The coastline is long enough so that the drift can last up to 40 minutes and cover almost 2 kilometres! Batu Bolong: plenty of sharks and excellent visibility. This dive is also called "Current City", and can only be dived when the conditions are fine. Tatawa Besar: this drift is a Komodo classic covered with orange soft corals, schooling batfish and a beautiful shallow hard coral garden. Tatawa Kecil: a spectacular drop-off. Impressive coral reef, turtles, tuna, giant trevallies, sweetlips, groupers and countless fish. Takat Makassar, if currents allow: look for manta rays at the cleaning station.

Day 5: Padar

Unique species of nudibranchs. The coral pillars, which sit in a strange "W" shaped configuration, are literally alive with color. Holothurians cover almost every bare surface. Lionfish and Napoleons populate the tops of the pillars. Subject to strong currents and an almost permanent surge, this can be a challenging yet beautiful dive. A quick hike up the gentle slopes of Padar provides an outstanding view of both Komodo and Rinca. Three Sisters / Tiga Dara: rocks nicely covered with corals and just teeming with life. You will dive sheltered from the current and finish on the peaks that rise up to 8 meters.

Day 6-7: South Rinca / Horseshoe Bay & Nusa Kode

The colder plankton-rich waters of the Indian Ocean make this area a bit colder than the northern regions of the Park. The sea-life gets everyone into the water, even four times the day. Cannibal Rock, a small submarine ridge. The reef-top is littered with feather stars, brittle stars, sea cucumbers, anemones and all kinds of corals. The deeper rocks provide hiding places for nudibranchs, frogfish and even rhinopias. Torpedo Alley, hosts also ghost pipefish and other extraordinary creatures.

Day 8: North Rinca / Loh Buaya Trekking

Stop near the "Second Ranger Station Loh Buaya", next to "Wainilu Island", the paradise of macro. Many different and rare kinds of nudibranchs, ghost pipefish and other surprises. After lunch, we will walk on Rinca Island to see the infamous Komodo dragons and we will be back in the water by noon.

Day 9: Labuan Bajo

After a nice breakfast on board, our crew will organize transfers to Labuan Bajo Airport according to your flight schedules. Unfortunately we have to say goodbye but we hope to see you again on board.

Number of dives: 20-23 dives including the night dives

Dive Experience: experienced Open Water Diver or level 2 (minimum 25 logged dives)

When to go: April to October

Please note that this itinerary is a diving program and can be changed depending on many factors!
